Leaping Ahead in Energy Saving Technology

Innovative Products Reducing Energy CONSUMPTION

Changing use patterns: reducing power consumption – bringing down cost

The responsibility a company is taking for its own employees and processes is becoming more and more important and broadening the scope to more responsibility for society and environment. We are leading in that field since years. And the future focuses even stronger on “minimizing” environmental effects.

Sophisticated technologies bringing down the energy consumption.

CLIENTS OVERALL

Power Management – Pre-installed on all our Clients

- Power scheme saves ~ 15 % of energy consumption
- DeskView Energy saves approximately 15 % of energy with remote power management settings

DESKBOUND DEVICES AND PERIPHERALS

Unique power supply with up to 94% efficiency (ESRPIMO E/P 900)

- Saves up to 15% power consumption and costs compared to a standard PC

Switched monitor outlet (dedicated ESPRIMO PCs and CELSIUS workstations)

- Up to 10% savings in display power consumption

0-Watt technology (ESPRIMO PC and P line Displays)

- Savings of up to 70% energy consumption compared to a six year old system (PC)

NOTEBOOK DEVICES

EcoButton

- Extend battery life by powering down energy consumption of some components and display brightness

0-Watt AC Adapter

- does not consume energy when it is turned off

Display

- HD display with energy saving LED backlight

ENERGY STAR® compliant products¹⁾ (For more information please refer to www.energystar.eu)
